Twitter LinkedIn Email. Working Paper 12984 DOI 10.3386/w12984 Issue Date March 2007. U.S. educational and occupational wage differentials were exceptionally ...

"The Race Between Education and Technology is a most important study, both for what it teaches us about the past and also in presenting policies for the future if America is to regain its world leadership in education." Stanley Engerman, University of Rochester

The book argues that technological change, education, and inequality have been involved in a kind of race. During the first eight decades of the twentieth century, the increase of educated workers was higher than the demand for them. This had the effect of boosting income for most people and lowering inequality.

The Race between Education and Technology — Claudia Goldin ...

The Race between Education and Technology6 function is assumed to be CES (constant elasticity of substitution) in skilled and unskilled labor with an aggregate elasticity of substitution between the two types of labor given by σ SU.
“The Race Between Education and Technology contains many tables, a few equations and a powerfully told story about how and why the United States became the world’s richest nation—namely, thanks to its schools... Beginning in the 1970s, however, the education system failed to keep pace, resulting, Ms. Goldin and Mr. Katz contend, in a sharply unequal nation...

The Race between Education and Technology is a multilayered book with dozens of interesting and useful ideas and hypotheses, all supported with historical evidence and data. But its core, as we see it, is made up of the following four arguments: 1. U.S. leadership, which Goldin and Katz describe as U.S. “exceptionalism,”

The Race between Education and Technology: The Evolution of U.S. Educational Wage Differentials, 1890 to 2005 Claudia Goldin and Lawrence F. Katz Harvard University and National Bureau of Economic Research This paper is an updated version of Chapter 8 of our book, The Race between Education and
What conclusions can you draw about the relationship between race and education based on these charts? From the data, a higher percentage of Asian/Pacific Islanders, two or more races, and Whites complete a college and graduate degree. On the other hand, a lower percentage of African Americans, American Indian or Alaska Natives, and Other complete college and graduate degrees.

What conclusions can you draw about the relationship...

An implicit framework is one of a race between education and technology (RBET). The notion was first expounded by Jan Tinbergen (1974) and was later built on and applied to the US case by Katz and Murphy (1992), Goldin and Katz (2008), and Autor (2014), among others.

Extending the Race between Education and Technology

This view of skill-biased technological change has been described as a race between education and technology. The Harvard economists Claudia Goldin and Lawrence Katz explain rising income inequality in the United States as a result of the education system failing to keep pace with technological innovation and the rising demand for higher-level skills.

Rethinking the Race Between Education & Technology ...

"the race between education and technology" is an extended argument about how educational attainment and skill-based technological change form a neat supply-demand model that in term determines wage inequality. arguing against other hypotheses like globalization, immigration and automation as explanations, goldin & katz stress how the supply side of this model (educational attainment) seems to be the determinant factor. the simple yet elegant supply-demand model they employ may seem too reductiv

The Race between Education and Technology by Claudia Goldin

The race between education and technology provides a canonical framework that does a remarkable job of explaining US wage structure changes across the twentieth century.
Extending the Race between Education and Technology ...

The notion of a race between technology and education was brought up by Jan Tinbergen (1974) and was, more recently, extensively discussed by Goldin & Katz (2010).
